What I do

+ PHP Development

I code websites and web applications using PHP5 + JavaScript + MySQL. In larger projects I include some of MVC frameworks (Yii, CakePHP) and jQuery. I like Twitter Bootstrap pretty much and I am fan of webkit and html5.

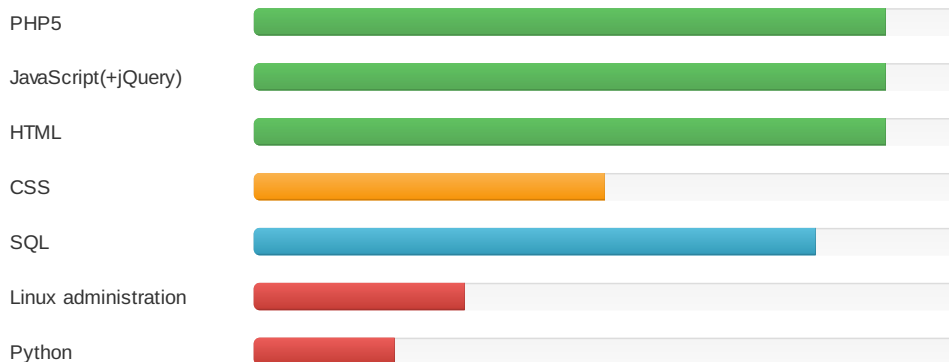

+ Office and reporting automation

Importing/Exporting of various data formats to and from databases, XML, MS Excel and MS Access VBA macro scripting

+ Linux exploration

I learn Python and Bash shell scripting, I can do basic web-server administration as well

Skills

Work Experience

+ WebSupport.sk | PHP Developer

Coding of external projects mainly using Yii development framework

+ AT&T | Query specialist
